EDUCATION

National Technical University "Kharkiv Polytechnic Institute"
Master's degree | 2013-2018
Computer and Information Technology, System Programming

Advanced training, courses
Source IT, JavaScript (Front-end) | 2017 Author's course by
Vladilen Minin | 2021

WORK EXPERIENCE

Middle / Senior Front-end developer (Vue.js)

TMsys (Poland) | May 2022 - March 2025

Platform for analyzing and optimizing business energy costs.

- Sole frontend developer responsible for the entire client-side implementation.
- Developed complex dynamic charts and analytics systems for data visualization.
- Optimized data loading and processing for high performance with large datasets.
- Designed a customizable UI with adaptive elements for complex use cases.
- Integrated interactive control panels, filtering, and personalized settings.
- Engineered the frontend architecture to ensure a seamless analytical experience.

CRM for designing solar panels

- Developed configurations and performed various calculations, including the impact of terrain, shading, and losses.
- Displayed data using different charts and presented various lists of devices such as inverters, panels, and batteries.
- Managed a wide range of functionalities and enhancements within the system.
- Overcame one of the most challenging tasks: saving a page as a PDF file, including all data and charts it contains.

CRM for builders

- Developed various pages and components for a CRM system tailored for builders and architects.
- Implemented features such as worker workload management, ticket calendar, worker customer pages, etc
- Created file system functionality within the CRM, enabling storage and management of images and files.
- Sole front-end developer on the project, responsible for all front-end tasks and ensuring seamless user experience.
- Wrote comprehensive Cypress tests for components to ensure reliability and performance.
- Migrated from Vue 2 to Vue 3

Mango Studio | August 2023 - December 2024 (Part time)

- Developed 10+ websites based on a custom CMS for the automotive industry.
- Created tailored layouts and components to match specific client needs, focusing on car dealership and service websites.
- Implemented custom styling for each site, ensuring unique branding and consistent user experience across platforms.
- Collaborated closely with back-end developers to integrate CMS features, dynamic car listings, booking forms, and SEO metadata controls.
- Optimized performance and accessibility across devices and browsers, enhancing site usability and search visibility.
- Migrated custom CMS from Vue2/Vuetify2 to Vue3/Vuetify3 and implement new features

Front-end developer (Vue.js)

MetraBit | May 2021 - March 2022

- Development of a web interface for a cryptocurrency exchange
- Support and optimization
- Development of static pages with SSR support
- Involved in coding the various core components for Interfaces in the different applications using Vue.js
- Involved in Developer Sessions, gathering requirements, and developing web applications using Agile methodology.
- Implemented Single Page Application (SPA) architecture and client-side MVVM (Model View-View Model) using Vue.js.
- Used JQuery and JavaScript library to dynamically update and validate the user input and the page content on the client-side.
- Development of Client-Side validation techniques using JQuery and Vue JS directives.
- Development of custom Vue directives, which can be used along with HTML 5 components for DOM Manipulation.
- Implementing and maintaining the reusable components in the Vue.js
- Used karma-test runner and Jest for JavaScript Unit testing and used JIRA for bug racking and issue tracking.
- Performed client-side validations over the forms using JavaScript Used Ajax to refresh only certain sections of the page and reduce the load on the webserver implemented client-side application to invoke Restful Web Services and hydrate the data into the Store.
- Implemented best coding practices and standard naming conventions while coding in JavaScript, HTML, and CSS
- Developed and support PWA apps

Front-end developer (JS/Vue.js)

ScrumLaunch | Nov 2020 - Feb 2021

- Built Web pages that are more user-interactive using Vue.js, HTML5, CSS3, LESS, RESTful API Services, JavaScript, Bootstrap, Git, JSON.
- Worked multiple components for different course element players and quiz question players using Vue.js and Vuex Development of code using JSP code, HTML, CSS, JavaScript libraries such as JavaScript, Vue.js, jQuery
- Prototype plus relevant coding standards Involved in User sessions, gathering requirements and developing web-applications using Agile methodology
- Involved in daily SCRUM meetings to keep track of the project status.
- Successfully performed the RESTful APIs Integration using XML and JSON.
- Progressively enhance form elements with jQuery to add more robust functionality. Worked on consuming JSON object creation, parsing on both clients as well as server-side.
- Used CSS3 based design techniques to eliminate table-based layouts, and speed page loading.
- Used jQuery to traverse through a DOM tree and manipulated the nodes in the tree.

Markup developer/Junior frontend developer

GoodTeam | Apr 2018 - Okt 2020

- Development of landing page, online stores, corporate websites, promo pages
- Optimization
- Connecting libraries and creating scripts on JS / jQuery
- Designed & developed SPA apps using HTML5, CSS3, JavaScript, Vue.js, and Ajax.
- Develop and test across multiple browsers, platforms, and devices, including smartphones and tablets
- Work with REST API architecture, contract approach (work with swagger and etc)
- Wrote high quality code with readability, efficiency and maintainability in mind (documentation)
- Actively participate in our scrum meetings work with the team to diagnose and resolve bugs and support requests
- Created forms to collect and validate data from the user in Vue.js and JavaScript
- Developed additional UI Components using JSF and implemented an asynchronous, AJAX (jQuery) based rich client to improve customer experience
